

# EXAMINING ADVANCING PHYSICS

One-day conference Saturday 7 November,  
Institute of Physics, 76 Portland Place, London.

## Would you like to meet with the examiners and discuss recent examinations?

Then book your place at our Examining Advancing Physics conference at 76 Portland Place. This free one-day event, introduced by the principal examiners of the course, is an opportunity to:

- consider recent examinations;
- learn about the process of producing examinations;
- network with other Advancing Physics teachers;
- contribute suggestions that reflect the spirit of Advancing Physics.

The opening sessions will review the recent (June 2009) examination series. These sessions will be led by the principal examiners of the papers concerned. The morning will conclude with a discussion of the process of question development.

The afternoon sessions will concentrate on developing questions for specific areas of the course. Delegates are asked to bring a draft question, suitable for Section A of the examinations (about four marks), for this session.

Sponsorship by the Institute of Physics enables this to be a fee-free conference, which will include a warm lunch and refreshments. However, space is limited so book your free place now to avoid disappointment.

Complete and return the booking form below or contact Kerry Hopkins for further details:
